I'm not sure which corner of hell this piece of♥♥♥♥♥crawled out of, but it needs to go home and stay there. If we had the capability to manipulate time and space, send this back to the year 1995 where it belongs.

I'm lost for words, I cannot describe how awful this game is.

10/10 would recommend. It's a fun game at first but only has 1 maze.. I love this game. Its branching conversations remind me of the ones in games like Planescape: Torment, Deus Ex, The Walking Dead, and others like it--there's no "good" or "evil", just interesting decisions that leave me pondering my choices for long swaths of time.

The setting is great; it's timeless in its own way, as it tackles issues of modernization vs. tradition that have confronted societies throughout history. The author claims on his website that his career has nothing to do with his Masters degree in Comparative Ethnic Conflict, but it's clear to see its influence here. A delight for fans of history, moral ambiguity, and great characterization.

About the only thing I can knock this game for is its incessant pounding of "Canon in D" into my skull, but that can easily be switched off by setting the music volume to 0.. Pretty cool stuff. Only thing that bugs me is that there isn't a video for June yet. Granted it's only July 1st, so I guess I shouldn't complain. :). It's hard to put into words how I feel exactly about Umineko. It's very easy to say "I adored it", but that's too easy. "I'll never forget it", "It's inspiring", "One of the finest works of fiction I've experienced", "Something no one should overlook" - So many things I can say, but nothing feels just right.

Umineko is a story about murder, love, mystery, tragedy, acceptance, and most importantly, magic. To quote another review I read, "it taught me true magic".

I can't really give this a proper review, and honestly if you're looking at reviews for the Answer Arcs you've probably already read the Question Arcs, so you'll get around to this eventually. This is more a letter of appreciation to the people over at 07th Expansion.

Thank you for writing Umineko. I will always treasure this cat box.

Love you to bits, Battler and Beatrice. You deserve some rest.. Awful game. The concept itself isn't bad. It's a strategy/card game. What makes it broken, is that it asks for prompts every time you construct a ship, or end your turn. Has no flow.

Hands down it's just 12/10 i am in love with it!. Contains thicc♥♥♥♥♥♥. You're going to have a real '♥♥♥♥♥♥' time playing this game, this game really 'stinks' hahaha XD

Best game ever yo! :D. This game is decent if you get it for Android but definitely not for PC.

Bad features: annoying music(it becomes that after some time), no explanation of who the characters are, I guess this is one of the games that you just run and play, but if they show some characters in there they should at least explain about them, also as I see in the store page some characters appear in screenshots, but don't be wrong there is no explanation of who they are, and I didn't saw most of them also even playing the game, lack of basic things in options like language change, bugs(developers tend to fix them, but still there are), not good race system, little confusing menu, and dead multiplayer.

Good things about the game, it has controller support, achievements, Steam Trading cards.. Jogo muito interessante. Muito mesmo. Há muitas possibilidades devido à aleatoriedade da criação dos sistemas solares. Recomendo fortemente.. One of the most under-rated games ever!

9/10 easy

Good physics

mostly good AI

Don't expect much help from your teammates

Bomb terrorists. This is more or less your average Rails Shooter game like GG:DP with twice the \*plot\* It's more difficult on the player gameplay-wise, but easier on the player story-wise. I may be in the minority when I say this, but I enjoy this title a bit more than the GG:DP. They fixed some problems I was upset about in their previous GG port, but it's far from a perfect.

- ✓ Plenty of replayability like GG:DP
- ✓ Important scenarios has translations, It's easier for the player to understand what's happening and what they should do in specific scenes if they do not understand Japanese (GG:DP lacked this so it's a huge step forward)
- ✓ Separate Button Prompts in the options. You can swap around both m+kb and Gamepad buttons to your desire. (GG:DP lacked this as well)
- ✓ More activities/side-quest.
- ✓ Graphics/Gameplay is a lot better then expected.

- ✗ Half♥♥♥♥♥♥♥♥tutorials that relies on Gamepad only and leave the player to second guess what to press if they are using m+kb. (Same problem I had in GG:DP)
- ✗ Can shrink/move window around so it do not need to stay stationary wherever the game is launched but resets after a scenario/gameplay is finished.
- ✗ Game only has 2 window size options.
- ✗ Price is absurd. Reccomended to purchase during a sale.
